

Tariff Management Solutions

Stay ahead of tariff shocks – with timely insights, contextual impact assessments, and actionable sourcing intelligence.

Every tariff shift that goes unnoticed is a risk – to margins, timelines, and supplier relationships. Procurement teams struggle to respond effectively with outdated data, limited visibility into cascading impacts, and a lack of contextual insight to support negotiations.

Beroe's Tariff Management Solutions deliver actionable intelligence – from data to decisions – spanning tariff monitoring, deep multi-tier impact analysis, and proactive risk mitigation through Sourcing Location Optimizer and Supplier Discovery. Stay agile, informed, and a step ahead as you navigate tariff volatility with confidence.

Key capabilities

Tariff Monitoring

Track live tariff changes at the 6-digit HS code level across your key countries and product categories. Get AI-refreshed, specialist-validated updates from multiple reliable global sources as tariffs change or on a monthly basis.

Deep Tier Analysis

Understand how tariff changes ripple through tier 1, 2, and 3 suppliers and impact your final product pricing. Our custom-built, Generative AI in-house tool automatically breaks down products into sub-tier components and assigns cost weights, vetted by analysts to give you the insights to negotiate better, source smarter, and protect your margins.

Supplier Discovery

Find and validate suppliers with Generative AI-powered search. Access 220+ million suppliers, filter by category, location, or type, and receive shortlists curated by category experts, ensuring you only see the most relevant options.

Tariff Impact Analysis

Quantify the impact or cost of existing or proposed tariffs using your spend data under multiple scenarios. Visual dashboards help you pinpoint exposure fast across categories and regions, turning your spend data into actionable insights.

Sourcing Location Optimizer

Integrate tariff intelligence with data-driven sourcing location decisions through our Sourcing Location Optimizer. Simulate scenarios, compare sourcing options worldwide, and identify the best locations for your priorities.

Supplier Country	Spend (million)	Current Tariff Rate	Spend based on Current Tariff (million)	Spend Impact (%)	Optimistic Tariff Rate	Spend based on Optimistic Tariff (million)	Pessimistic Tariff Rate	Spend based on Pessimistic Tariff (million)

Why choose Beroe's Tariff Management Solutions

Tailored to your needs

Our solutions are configurable by country, category, and spend structure, ensuring alignment with your procurement priorities.

Human in the loop

Gain confidence from AI-updated tariff data validated by expert analysts for speed, accuracy, and procurement-ready usability.

Intelligent spend-based insights

Make sense of tariff exposure by leveraging your spend data. Understand the exact impact, plan for different scenarios, and sharpen your negotiation strategies.

Total value optimization

Confidently choose sourcing locations factoring in not just tariffs, but also supply availability, lead time, country risk, and sustainability metrics.
