

Procurement teams are expected to make high-stakes decisions across category strategy, cost, suppliers, negotiations, and supply chain risk, while also facing increasing pressure to use AI to work smarter. But the intelligence required is still fragmented across reports, data providers, and the web, while generic AI lacks the procurement context these decisions demand. Change that today with Beroe abi!

Meet Beroe abi

Your conversation-first digital procurement analyst. Ask a question in natural language and she dynamically draws on Beroe's decision-grade procurement intelligence across six domains: category, supplier, commodity, cost structures and price trends, macro data, and risk, delivering a decision-ready answer you can confidently defend. When deeper validation is needed, Beroe abi can connect you with Beroe's category analysts and industry experts. And if a broader search is needed, Beroe abi can help you search the web, using her procurement lens, with optional further validation.

Built on Decision-Grade Intelligence

Beroe's decision-grade intelligence is designed for high-stakes procurement decisions, combining validated data, procurement context, and expert verification so the intelligence behind the decision is:

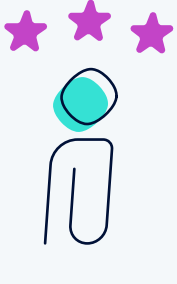

Explainable

See the sources, methodology, and assumptions behind the intelligence.

Defensible

Use intelligence that can stand up to challenge.

Accountable

Backed by expert validation when the decision needs a human behind it.

The intelligence foundation behind Beroe abi:

30M+

1B+ raw data signals vetted into **30M+ validated data points** turning market noise into robust evidence procurement teams can use.

5000+

experts through Beroe's Voice of Experts network, and 400+ category analysts bringing in human judgement when a decision needs deeper validation.

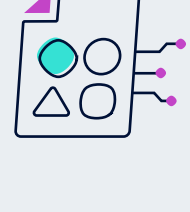

425+

category-specific licensed subscriptions and data partners consolidating specialist intelligence into one trusted view.

Validated data. Procurement context. Expert verification. Depth that generic AI and public sources cannot replicate.

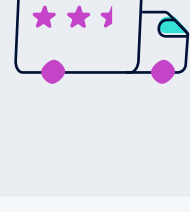

Six intelligence domains. One conversation.

Beroe abi dynamically draws across six domains of procurement intelligence, bringing together the context needed for the question you are trying to answer.

Category Intelligence to shape category strategy

Track market structure, supply-demand dynamics and category shifts across 3000 direct and indirect categories to understand when your sourcing strategy needs to change.

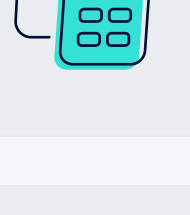

Supplier Intelligence to identify and qualify suppliers

Search across 300 million suppliers and assess alternatives by capability and financial health to support stronger supplier qualification and shortlisting.

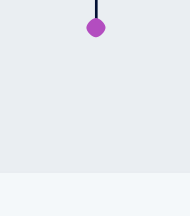

Commodity Intelligence to support budgeting and sourcing decisions

Use trusted price trends, forecasts and market analysis to understand cost movements, anticipate changes and strengthen budgeting, sourcing and negotiation decisions.

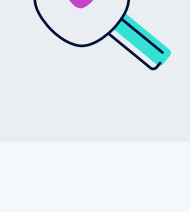

Cost Structures and Price Trends to negotiate with evidence

Break supplier pricing into labor, materials, overhead and margin to understand the underlying cost position and negotiate from facts rather than the quoted price.

Macro Data to anticipate market and cost shifts

Connect macroeconomic, regulatory and geopolitical signals to the categories and suppliers they affect, so you can understand emerging cost pressures and supply risks and act before they impact your business.

Risk Intelligence to act before disruption hits

Identify geopolitical and financial risk signals early enough to assess supplier exposure, inform mitigation decisions, and protect supply continuity.

Why Beroe abi is different

1 Procurement intelligence, not generic AI

Built from the ground up for procurement and backed by 20 years of category, supplier, cost, and market intelligence.

2 One synthesized answer across intelligence domains

Beroe abi brings the right context together dynamically, so users can get to an answer without leaving their workflow.

3 Human expertise when the stakes rise

Start with decision-grade intelligence from Beroe abi, then draw on Beroe analysts, category specialists and Beroe's VOX network when deeper validation or expert judgement is needed.

Turn intelligence into stronger procurement decisions

Reduce cost with stronger evidence

Negotiate using real cost structures, market benchmarks and category context, not supplier claims alone.

Strengthen supply continuity

Spot risk earlier, and identify credible alternative suppliers before disruption limits your options.

Move from research to decision faster

Spend less time gathering and reconciling information while keeping decisions explainable and defensible.

Decision-grade intelligence, one conversation away

Bring your next procurement question to Beroe abi.

See how Beroe abi brings together validated intelligence, procurement context, and expert support to help you reach a decision-ready answer.
